I am an assistant professor at College of Geosciences, China University of Petroleum (Beijing). I mainly use subsurface data analysis, analogue modelling and numerical simulation to study the tectono-stratigraphic evolution of sedimentary basins, particularly where the salt-controlled structures and deep-water sedimentary systems interact. I have worked closely with industry on multiple research projects in the last couple of years. Recently I am more focused on driven forces of salt tectonics and the associated structural and kinematic evolution in salt-bearing passive margins. I have published over 10 peer-reviewed articles in international geoscience journals.

Educational Diplomas

2015 PhD, Department of Earth Science, University of Bergen, Norway
2010 MS, Department of Earth Sciences, Royal Holloway, University of London, UK
2009 BS, Department of Earth Sciences, Zhejiang University, China

Employment

Assistant professor

2020.06 – present Department of Geology, College of Geosciences, China University of Petroleum-Beijing, China

Postdoc researcher

2016.07 – 2019.11 Department of Earth Science, University of Bergen, Norway

Teaching assistant

2013.09 – 2014.06 Department of Earth Science, University of Bergen, Norway

Research assistant

2010.10 – 2011.10 Department of Earth Sciences, Royal Holloway, University of London, UK

Research Visits

E.ON Stipendienfonds, EPOS TNA & L. Meltzers Høyskolefond

2019.07 & 2018.06 – 2018.09 Helmholtz Laboratory for Tectonic Modelling, German Research Centre for Geosciences (GFZ), Germany

Internship

2008.08 Seismology Bureau of Zhejiang Province, China

Membership of Professional Affiliations

Member of the American Association of Petroleum Geologists

Member of the International Association of Sedimentologists

Research Projects

Project leader (PI)

1. Science Foundation of China University of Petroleum (Beijing), 'Interaction between salt tectonics and sedimentation in salt-bearing basins', 2020–2022.
2. EON Foundation and EPOS (European Plate Observing System) sponsored project, 'Minibasin evolution in passive margin salt basins', 2018.
3. University of Bergen, SPIRE project, 2017–2018.

Project investigator

1. Statoil (now Equinor) sponsored project, 'Turbidites, Topography and Tectonics (T³): understanding the response of turbidity currents to structurally controlled seafloor topography', 2016 to 2020.
2. Total Norge AS sponsored project, 'Late Jurassic tectono-stratigraphic development of the Norwegian Central Graben and the influence of normal faulting on turbidite sedimentation', 2011–2015.
3. Petrobras sponsored project, 'Kinematics and Mechanics of Salt-related Fold & Fault Structures in South-Atlantic Passive Margin Sedimentary Basins', 2009 – 2011.
